

Test Review for Unit 4-Fingerprints

The definitions from the notes and the forensic packet will be matching.

Any type of question from the worksheets and labs are fair game.

For sure you should be able to:

1. State the three Fundamental Principles of Fingerprints.
1. Explain how and why fingerprints are found on objects which have been touched.
2. Explain the procedure, theory, and appropriate surface of use for each type of latent print development:

Dusting, Ninhydrin Spray, Iodine Fuming, and Reacting with silver nitrate and UV light.
4. Identify prints in their appropriate class
EX: Loop; Plain Whorl; Whorl Central Pocket Loop;
Whorl Double Loop; Whorl Accidental; Plain Arch;
Tented Arch
5. Identify each part of the skin diagram.
